

Placing Your Custom Banner Images Into The Blueball Ecom Sandvox Designs

Directions for Placing Your Own Custom Banner Images Into Your Ecom Design Layout.

The Blueball Ecom 760px width design and 960px width design both allow you to easily change out the default banner image that comes with each Ecom design with your own custom banner image.

We provide you with 5 different color png banner image files for each width version that match the accent color used in each of the Ecom designs to create your custom banner images with. You can open these up in the image editor of your choice and add in product images, type, etc. to them. Then save them using the file format and name specified below.

After creating your new banner image, open up the Site Inspector window, click the Media tab and then drag your image into the box labeled "Banner" or use the "Select" button to choose your custom banner image, and your new banner image will replace the default image used in the design automatically.

Your custom banner image must be sized exactly as noted below and saved as a .jpg image file and be named ecom_banner.jpg.

760px design width: 759px wide by 200px tall

960px design width: 960px wide by 200px tall

We recommend saving your 72dpi RGB jpg image file with a 85% to 100% quality setting using the save to web feature if available in your image editor.

Help Us Improve Our Sandvox Designs For Sandvox Users! Comments, Feedback, and Suggestions Are Welcome!

What do you think of our Sandvox Designs? What would you like to see? We need you to let us know what we can do to make your experience using Sandvox with our Sandvox Designs better for you. Use the contact form on our site or email us at sandvoxdesigner@gmail.com.
