

Placing Your Custom Banner Images Into The Blueball Focus Sandvox Designs

The Blueball Focus designs allow you to easily add your own banner image into your page layout. The custom banner image area in this design layout is placed into the title div area at the top of the page under the title line and logo image.

We do not provide generic custom banner images with this design. The default banner image is a placeholder image and is not meant to be used for an actual finished web site. We include a layered Photoshop file with all the banner background colors in it, the laptop image, the glow effect and a layer mask on individual layers for you to use to create your custom banner images with.

Your custom banner image must be sized exactly as noted below and saved as a .jpg image file.

Banner image size - 896px wide by 200px tall

We recommend saving your custom banner image as a 72dpi RGB (sRGB is fine too) jpg image file with a 70% to 100% quality setting using the save for web feature (if available) in your image editor.

After creating your new banner image, open up the Site Inspector window, click the Media tab and then drag your image into the box labeled "Banner" or use the "Select" button to choose your custom banner image, and your new banner image will replace the default image used in the design automatically.

Help Us Improve Our Sandvox Designs For Sandvox Users! Comments, Feedback, and Suggestions Are Welcome!

What do you think of our Sandvox Designs? What would you like to see? We need you to let us know what we can do to make your experience using Sandvox with our Sandvox Designs better for you. Use the contact form on our site or email us at sandvoxdesigner@gmail.com.

Best,
Charlie
